SUMMARY

A full stack developer and self-learner who loves to design and build applications. Mostly enjoy working in the frontend as the design is more important. I am working on new projects and exploring new technologies.

PROJECTS

JUICY-N-YUMMY | ANGULAR, NODEJS, TAILWIND CSS, MONGODB

May 2022

- A Food Ordering Website.
- Restaurants have to register to the app. So that anyone can order from their restaurants.
- Design is made using Figma and I mostly worked on Front-end.

INO | REACT NATIVE, FIREBASE

June 2022

- A platform for developers to gather project details and social links.
- It can be used in Portfolio Website to show all our projects through API.

ERP | REACT, MYSQL, SPRING

April 2023

- An ERP System that helps you to manage a team, whenever you work on a group project.
- You can create a Team, add members using their usernames, and assign tasks with deadlines.

CERTIFICATES
