Education

Indian Institute of Technology (Indian School of Mines)

M.Tech in Computer Science and Engineering

June 2028 (Expected)

Dhanbad, Jharkhand

Shri Shankaracharya Technical Campus

B.Tech in Computer Science and Engineering (CPI: 9.18)

May 2024

Bhilai, Chhattisgarh

Projects

Feasto | *Angular, Next.js, Flutter, Node.js, Golang, PostgreSQL, MongoDB, Redis, Elasticsearch*

Mar 2026 – Present

- Building a production-grade, multi-platform food delivery ecosystem comprising a customer web application, restaurant partner portal, and delivery partner mobile application.
- Designing a hybrid backend architecture using Node.js and Golang with PostgreSQL for transactional data and MongoDB for restaurant catalog and menu management.
- Implementing intelligent search, caching, JWT-based authentication, and scalable microservices using Elasticsearch and Redis.
- Integrating Docker, GitHub Actions (CI/CD), ELK Stack, Prometheus, Grafana, OpenTelemetry, and Jaeger to build a cloud-native, observable, and production-ready platform.

Solo Creator Studio | *Figma*

Jun 2025 – Nov 2025

- Designed a web-based UI/UX case study for a creator management platform supporting content planning and multi-platform publishing.
- Created interfaces for content scheduling, cross-platform publishing, analytics dashboards, and creator workflow management.
- Developed a scalable design system with responsive dashboard layouts and high-fidelity interactive prototypes.

MealMate | *Figma*

Feb 2025 – May 2025

- Designed a comprehensive UI/UX case study for a meal subscription application connecting users with local tiffin service providers.
- Created user flows for meal customization, subscription management, provider discovery, and order tracking.
- Produced wireframes, high-fidelity prototypes, and a reusable design system following user-centered design principles.

Rahobharat | *Flutter, Node.js, MongoDB, Firebase Realtime Database*

Mar 2024 – Apr 2024

- Developed a student accommodation discovery application for browsing affordable rooms, hostels, and shared housing near educational institutions.
- Designed interfaces for property listings featuring rent, amenities, availability, and location details.
- Implemented advanced search, filtering, room-sharing options, and user profile-based interactions for an improved housing search experience.

Technical Skills

Languages: C++, Go, JavaScript, TypeScript

Technologies: Angular, React, Next.js, Node.js, Flutter

Databases: PostgreSQL, MongoDB, MySQL

Tools: Git, Docker, GitHub Actions, Postman

Platforms: Firebase, Figma

Other: Sass, Redux, REST APIs, SSR, Microservices

Certificates

PCAP: Programming Essentials in Python – Cisco Networking Academy

CPA: Programming Essentials in C++ – Cisco Networking Academy

The Complete Go: Golang Bootcamp – Udemy

Angular 12 – Complete Beginner's Guide 2021 [Step by Step] – Udemy

Complete Figma Megacourse: UI/UX Design Beginner to Expert – Udemy
